

KOOLZONE

Monitoring Made Easy

REAL-TIME WIRELESS MONITORING

Helping you protect what is most important

TEMPERATURE

CO2

GPS POSITION

HUMIDITY

**POWER SUPPLY
& ENERGY USE**

DOOR CONTACT

AUTO LOGGING 24/7
Define the sample rate for each sensor; retain data for 5 years

ALARM NOTIFICATION
Select from a combination of email, text and phone call alarms

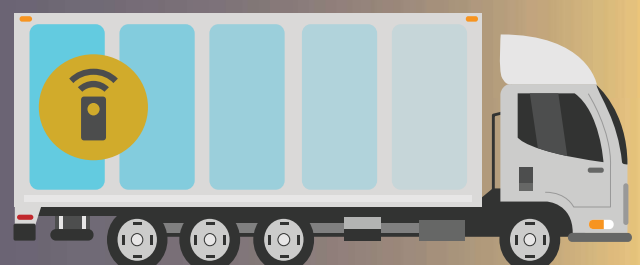

RESILIENCE BUILT IN
LAN + Cellular Connectivity
Battery Back-up
Data Logging
Ensures continuous monitoring

REPORTING
Easy access to historical data for all reporting and auditing needs

EASY TO USE
No training required
Unlimited user accounts

"The system is fantastic and the service is exemplary!"

Key Features

Quality, Reliability, Security by design, for regulated environments

Configure your system exactly as you need

Sensor operates inside refrigeration units - no wires, no engineers

The most powerful signal possible – easier connection, no repeaters, data consistency

3 to 5 year battery life – even at freezer temperatures

Early alerts, no stock loss
Reduced energy, longer unit life
Full compliance

Simple Installation In Three Easy Steps

1

Wireless Sensors go inside fridge or freezer

2

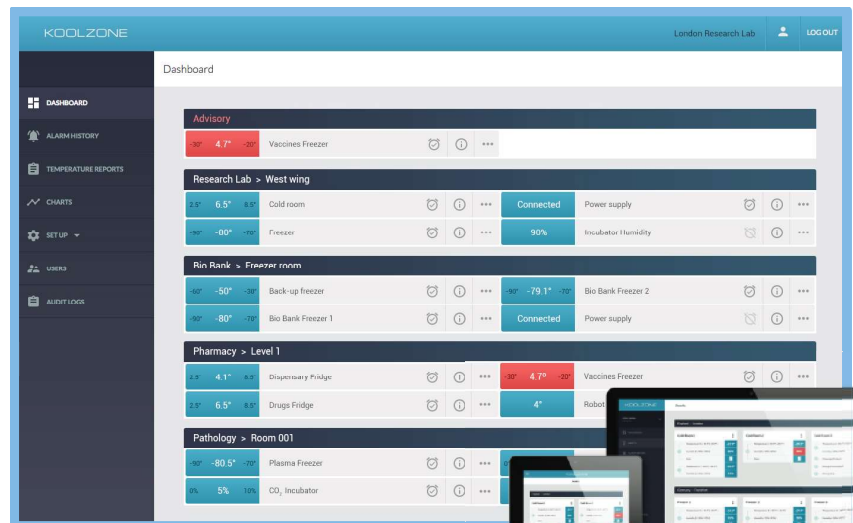

Plug in Gateway
Sensors communicate to Gateway

3

Name your devices, set thresholds. log in any time, any device, anywhere

Automated monitoring in every environment
